# Strączek

Furniture designer Ewa Tymoszyk takes inspiration from nature in her new chair designs inspired by green peas (*Pisum Sativum*). The curvaceous shape of the pea-pod becomes an ergonomic chair. They are constructed from sturdy steel rods and polyurethane foam, curvaceously draped in Velour fabric. Easy to assemble and dismantle, it's comfortable to use and transport. This is Ewa's homage to the furniture designs of the 60s is called the "Strączek" series.

**Kombo 16** is specially designed multi-functional furniture-toy for children aged 2 years and above. More than just functional furniture, **Kombo 16** becomes a tool for unlocking creativity in the child. Available in funky bright colours, it appeals to children's sense of playfulness. The child can create a table, rocking chair, podium and more. In a child's imagination – a conference room, fort or a spaceship! Based on the principle of building blocks. Various combination possibilities encourage the child to playfully create from the modules, what he needs. The number of combinations just depends on the child's imagination. Ergonomically designed it's colourful, funky, safe, convenient and easy to use.
